Just when you think you have heard everything that is beautiful in the genre of electronic music, something always comes along to shake the tree; that just happened with the release of the quite stunning **The Riddle Of A Soul** by **Anantakara**.

This lush and at times quite moving opus of electronic brilliance is one of those singles you literally never want to end, the compositional structure, its ambience and performance, all drew me in to a realm as of yet untouched, and by its conclusion, one that would leave me wanting more.

The Riddle Of A Soul is nothing more than six minutes of musical magic by **Anantakara**, and one that I truly believe could be quite popular with the listeners and fans alike.
